Summary

Dynamic Project Manager with a proven track record of leading engineering projects and driving projects from conception to completion. Skilled in research and advising clients in fast-paced environments. Leveraging analytical ability to improve productivity, maintain a positive attitude and event planning expertise. Fosters collaboration and success in team settings. Effective communicator with strong interpersonal skills, working well with clients and team contribution. Self-directed and energetic with superior performance in both autonomous or collaborative environments. Seeking internships in project management or development. Hardworking Student offering part-time work experience and extensive knowledge of core values. Highly meticulous and detail-oriented with excellent chronological, organizational and communication skills.

Skills

- Event planning
- MS Office
- Python programming language expertise
- Programming languages: Java, C++, Python
- Machine learning in Python
- API integration
- Software development
- Data analytics
- Data science principles implementation
- Machine learning
- Statistical assessment
- Deep learning

Experience

Work Study Student

- Followed school and classroom policies, regulations, dress codes, and schedules.
- Searched at library and in scholarly databases to locate necessary information for research projects.
- Collaborated on group projects to complete professional deliverables.
- Utilized professor office hours to clarify topics needing elaboration.

Project Manager

- Identified plans and resources required to meet project goals and objectives.
- Planned, designed, and scheduled phases for large projects.
- Met project deadlines without sacrificing build quality or workplace safety.
- Managed projects from pre-screening to conclusion.
- Proved successful working within tight deadlines and a fast-paced environment.

Project Developer

Developed following projects:

- [Estimating stock-keeping units using ML](#)
- [Flood Risk Prediction and Mitigation using Random Forest ML Algorithm and Real-Time Weather Data](#)
- [Document Forgery Detection](#)

Project Engineer

- Monitored installation of materials and equipment for compliance with drawings and specifications.
- Determined and scheduled priorities as required to progress engineering work.
- Completed construction tasks while providing safe working conditions, staying on budget and meeting project deadlines.
- Identified technical risks within managed projects.
- Requested change order requests in response to out-of-scope work activities.
- Maintained records for each project and engineering discipline.

Education

Bachelor of Technology in Computer Engineering | VIT Bhopal University at Bhopal, India

Expected in October 2027

High School Diploma | Sacred Heart Convent School at Obra, India

May 2023

Certifications

- Getting Started with Artificial Intelligence, IBM
- Introduction to AWS Cloud for Solutions, IBM
- Machine Learning in Collaboration with Google for Developers, The SmartBridge

Languages

- **English:** Upper Intermediate (B2)
- **Hindi:** Advanced (C1)
